

Contel I.T.S wins a bid for the new MES system of Unilever ,Israel.

May 7th ,2006 ,Tel Aviv.

Contel I.T.S to implement a new MES Project at Unilever's Shefa Arad cereal plant.

The project includes the installation of a central MES PLC which will be interfaced multi-vendor automation layers on the plant. The MES PLC will function as a data source for the MES application. The system is to be based on the advanced MES package offered by **Rockwell Automation**, and will also include interfaces to the plant ERP system- SAP. According to Mr .Shai Gershon ,Contel I.T.S General Manager, *"The future MES system will play a major roll in any corporate decision-making process undertaken by the plant management. The application of an advanced MES System is expected to reduce costs, as well as to improve productivity within a few months"*. In addition, Unilever plant managers will have better key performance indicators (KPI) concerning in-process manufacturing.

Contel I.T.S enjoys a vast experience in the regulated industries (Food, Beverage, Pharmaceuticals, etc.) which endowed it with a significant advantage over other competitors. The company is subsidiary of **Contel Automation and Control** and specializes in the delivery of Manufacturing Execution Systems (MES).
